ABOUT US

WHAT WE DO

Green Build Environmental Ltd provides a cost effective service in the removal and recycling of Contaminated, Non Hazardous & Inert spoil, as well as the production of Recycled Aggregates in accordance with WRAP Protocol.

H&D Plant Hire offers the most comprehensive supply of 5 tonne to 22 tonne Machines available in the market place. In addition, we also have a host of attachments to suit any on site requirement.

PHILOSOPHY

The philosophy that is encouraged throughout the business is to always provide the most sustainable and cost sensitive solutions that are available and to not allow service to become affected.

VISION

Our vision is to be recognised as the best service provider of Muck Away, Recycled Aggregates & Self Drive Plant Hire across London and the South East

AREAS WE COVER

“WHATEVER THE
OBSTRUCTION, WE
HAVE THE SOLUTION”

SELF DRIVE PLANT HIRE

H&D Plant Hire are rapidly becoming one of the most efficient Plant Hire providers in the South East.

The fleet is renewed every 3 years in order to offer the most reliable and modern machines in the market place, with the latest technology being utilised so as to greatly reduce down time.

We pride ourselves on being able to supply machines 365 days per year.

SELF DRIVE TRACKED EXCAVATOR HIRE

Every model on our Self Drive fleet is fitted with the latest tier 4I engine, meaning that DPF filters are NOT needed.

All of our fleet of Tracked Excavators can be Height & Slew Restricted on request. This feature is ideal for works carried out near bridges, listed buildings, railway projects and under live cables.

Our excavators range from 8 tonnes to 22 tonnes.

All machines can be piped to fit various attachments to suit site requirements.

We offer a wide range of attachments to suit every site application.

- Hydraulic Breakers / Hammers
- Selector Grabs
- Munchers / Pulverisers
- Riddle Buckets
- Grapples

SELF DRIVE DUMPER HIRE

Our fleet of dumpers range from 6 tonnes up to 9 tonnes. We offer our clients the option of either straight or swivel tipping in order to enhance our confidence that we have the right dumper for every application.

“We have used H&D Plant Hire for over a year and have always found their machines to be very well maintained. Whenever we collect or drop back a machine, there is always someone in their yard regardless of the time of day or night which makes our lives much easier”

Sam Davies, Plant Manager, J L Knight Roadworks Ltd

“H&D Plant Hire supply us with their JS130 Tracked Excavators for all of our sites in London. We use this particular model and spec of machine because this is what our internal test results proved was the most effective machine for our torque head attachment to go on”

Tony Marsh, Senior Contracts Manager, R&D Screw Pile

“We were recommended to H&D Plant Hire last year to supply our machines for a night work project on the M3. We were extremely happy with the price and availability of the machines, as well as the promptness of delivery to site. We had 3 x JS130 Excavators, 2 x Breakers & 2 x 9t Swivel Dumpers for 22 nights and did not have one single break down”

Dion Reatch, Project Manager, Interserve Special Projects

PLANT HIRE SUPPLY CHAIN

“We had been negotiating units with Green Build Environmental Ltd and H&D Plant Hire since the back end of 2014 and we are delighted to have been able to secure their business. They are one of the first companies in the UK to purchase our 2015 models of 14t Bladed Tracked Excavator’s and 22t Tracked Excavator’s. The size of the fleet that they now operate means that they can service any large project in the South East.”

Jason Davey, Regional Sales Manager, TDL Equipment c/o SANY

DIG & CART PACKAGES

Green Build Environmental Ltd is an experienced & professional service provider on a Labour, Plant & Materials basis for all manner of Sub Contract Works on projects across London & The South East.

Our steady growth and consistent client satisfaction, resulting in repeat business, has enabled us to undertake projects ranging from £50,000 up to £500,000.

“H&D Plant Hire has a fantastic business model which goes hand in hand with the already established Green Build Environmental Ltd.

We have been extremely impressed with their investment forecast within the current market place and can only foresee a fantastic business relationship for us and them going forward.”

Paul Serby, Territory Manager, Greenshields JCB Ltd

“Green Build Environmental Ltd and H&D Plant Hire were invited to attend our Plant Show at Chelmsford last year to see our latest models that were on the production line for 2015. They became one of the first companies to purchase a number of 9t Straight Tipping Dumpers to add to their already large fleet of 9t Dumpers.”

Rob Freestone, Area Sales Manager, Ernest Doe Construction Equipment

WHY USE GREEN BUILD ENVIRONMENTAL LTD?

It is our main priority to deliver all of our projects in a safe, efficient manner, and to ensure that the works are undertaken in accordance with our client’s specifications and in line with programme.

We employ a Health & Safety Consultant who undertakes the responsibility of Method Statements, Risk Assessments and general site safety inspections.

- Own Fleet of 8 Wheeler Tipper Lorries
- Fully Licensed Local Disposal Facilities
- Recycling Centres for Contaminated & Non Hazardous Spoil
- Internal Plant Hire Division
- CPCS Accredited Plant Operators

We are committed in providing quality and value on every project that we undertake.

TYPES OF SERVICES PROVIDED

Our company is uniquely balanced to offer a one-stop shop for our clients on the below:

- Bulk Excavation
- Basement Construction
- Underground Car Parks
- Enabling Works
- Top Soil Strip
- Reduced Level Dig
- Piling Mat Construction
- Piling Mat Attendance
- Piling Mat Reduction
- Drainage

CONTAMINATED SPOIL REMOVAL

Green Build Environmental Ltd's core business has allowed us to develop various ways of isolating and/or extracting contaminated hot spots, disposing of the area accordingly, and then reclassifying the underlying strata with new chemical testing on the remaining land.

On the 1st April 2014 the landfill tax for Hazardous Waste will rise for a seventh consecutive year to £80 per tonne. This means that an average 18t tipper load of Hazardous Muck Away will cost £1,440 in tax alone – this figure does NOT include the disposal cost of tipping nor the haulage cost for transporting the material from site to source.

ASBESTOS CONTAMINATION

We are one of the only companies in the South East that can process Asbestos Contaminated Spoil as opposed to taking it directly to landfill.

Our alternative solution is therefore landfill tax exempt and comes with a comprehensive paper trail in full accordance with EA guidelines and legislation.

MUCK AWAY

Green Build Environmental Ltd is one of the country's leading soil recovery and assessment specialists. Our extensive experience and knowledge allows us to offer a unique and significant saving to our clients on all of the projects that we are involved with.

We specialize in the removal and recycling of Contaminated, Non Hazardous and Inert spoil across London and the South East, with our overall aim being to achieve 0% to landfill.

We are directly involved with a vast number of Inert Only facilities and can therefore undertake and service any size of project, and in line with any particular programme – including night work.

Our fleet of 8 wheeler tipper lorries and drivers are accredited to work on sites such as Crossrail Stations & Airport Projects as well as all general building & construction works.

SOIL TESTING

We offer all of our clients the option of having us undertake analytical waste classification of their spoil which is to be removed. The reports can be tailored to meet specific requirements and can be turned around in 3-5 working days on average.

COMPLETED PROJECTS

All available on our Case Studies page on the website

Carillion @ Tidal Basin Road, Canary Wharf, E16 – 9,000m³

Higgins @ Billett Road, Walthamstow, E17 – 11,000m³

Heronslea @ Sparrows Herne, Bushey, Hertfordshire – 9,000m³

Countryside Properties @ Grahame Park, Lanacre Avenue, Hendon – 30,000m³

Lakehouse @ Battersea Dogs Home, Sopwith Way, Battersea – 8,000m³

RECYCLED AGGREGATES

Green Build Environmental Ltd recognizes that over the past decade, the bulk of London's biggest projects have been built on the use of Recycled Aggregates.

Not only do they offer a direct alternative to Quarried Stone, but they also offer a substantial cost saving.

Our business has tailored itself to incorporate this statistic in to our way of working and the materials in which we offer to our clients.

THE TWO MAIN PROCESSES OF OUR RECYCLED AGGREGATES ARE:

- Soil Washing
- Dry Screening

If there is a specific material that one of our client's needs, we can carry out the relevant testing on our aggregate and submit accordingly.

BELOW ARE A SMALL SELECTION OF THE AGGREGATES THAT WE CAN SUPPLY:

- DOT Type 1 Crushed Concrete – fully clause 803 certified
- Type 1 Graded Only
- Type 3 (also referred to as Type 1 X)
- 6F2/6F5
- 6F1/6F3
- 6F4 Tarmac Planings
- 6C, 6I, 6J, 6N, 6H, 6P
- 6G (recycled alternative to gabion stone)
- 4/10mm Shingle
- 10/20mm Shingle
- 20/40mm Shingle
- 4/20mm Shingle
- Reject Sand

“Green Build Environmental Ltd managed to produce a Recycled Type 3 for our project at Simon Balle School in Hertford. We wanted to use a recycled alternative to Granite or Limestone because of its environmental benefits. Their Yard Manager took our Materials Buyer to their recycling centre in Purfleet to visually approve the material and, after the sample load was tested on site, we imported 3,760t over a 3 week period for the brand new sports pitch.”

Tony O'Shea, Balfour Beatty Projects

“Green Build Environmental Ltd supplied over 10,000t of Type 1 Crushed Concrete as well as 3,000t of 10mm Recycled Pipe Bedding to our project at Europa Littlebrook in Dartford. The Type 1 was used for the footprint of the building and the pipe bedding was used for the drainage.”

Leon Wiseman, Buckingham Group

TESTIMONIALS

“We have used Green Build Environmental Ltd on our recent below Blue Chip Projects. They have demonstrated that they can keep up with programmes and also meet the demands of our intense Muck Away schedules.

- Tidal Basin Road, Canary Wharf
- Albert Bridge Road, Battersea
- Billett Road, Walthamstow
- Priory Drive, Dartford
- Plaistow Hospital, Samson Street, Plaistow
- Stratford Edge, 80-82 High Street, Stratford

H&D Plant Hire was first used on our site in St Albans. We required 2 x 14t Excavators and 1 x 22t Excavator for a 4-6 week enabling works package.

They supplied us with a brand new 14t SANY Excavator and a brand new 22t SANY Excavator straight out of the factory. We also used a JS130 that had under 400 hours on the clock.”

Operations Director, Large Reinforced Concrete Frame Contractor

“We have worked closely with Green Build Environmental Ltd and H&D Plant Hire for over a year. They have undertaken bulk excavations and piling mat construction on two sites for us in West London and one site in Hertfordshire.

We like the fact that they give us straight answers to the questions we ask and that all of their operatives are professional in their approach to carrying out the works.

The Plant Hire arm of their business has always delivered very clean and tidy pieces of machinery.”

Chad Constable, Managing Director, A1 South Ltd

“Green Build Environmental Ltd have always provided a first rate service with tipper and grab lorries on all of the sites that I have overseen.

If there is a material which we aren't sure about on site, then their technical lads come out and advise us on how best to segregate and remove the relevant spoil.”

David Jones, Site Foreman, Jackson Civil Engineering
